

**Com.-No. 2217**

**RASTER-Stamping Press-HR-60/700-NL-4S**

**Technical Data:**

Nominal pressure at 30 degrees before BDC	kN	600
Speed, infinitely adjustable	spm.	60-300
Ram area	mm	700x430
Bed area	mm	700x530
Opening in bed	mm	120x550
Ram stroke, adjustable in steps of about 5 mm	mm	20-80
Max. distance between bed and ram at TDC (at max. stroke and turned-in con-rod)	mm	390
Ram adjustment, infinitely adjustable	mm	80
Height of strip entry above bed	mm	85-115
Pneumatic pressure for the clutsch	bar	6
Electrical motor output	kW	38
Total weight	kg	9200
Year of construction		1986

The press is completely overhauled and equipped with a new SPS-control unit

**Gripper Feed: RASTER-Z2**

Feed length, max.	mm	5-150
Strip width, max.	mm	5-150
Material thickness, max.	mm	2,5

**Price + delivery time:**

**on request**

Errors excepted.

All technical data, dimensions and so on are according to the indications of the manufacturer and are without obligations for us.

Subject to availability and interim sale.
